

Additel 227, 227Ex Documenting Multifunction Process Calibrator

- Sourcing, Simulating and Measuring Pressure, Temperature and Electrical Signals
- Built-in Full Hart Communicator (ADT227-HART)
- Built-in Barometer
- Intrinsically Safe Models Available (Ex)
- Large Smartphone Like Touchscreen User Experience
- USB Type-C and Bluetooth Communications
- IP67 Rated
- High Voltage Measurement Capability (300V AC)
- True RMS Voltage Meter Capability
- Dual Channel Pressure Module Ports
- High Static Differential Pressure Measurement 0.002% FS
- ISO 17025-accredited Calibration w/data Included

OVERVIEW

.....

Additel's new Multi-functional Documenting Process Calibrator series takes portability, functionality, and accuracy to a whole new level and packages it with an intuitive and easy to use color touchscreen display. This series includes an advanced documenting pressure calibrator (ADT227) and an advanced documentation process calibrator with a builtin HART communicator (ADT227-HART). Additionally, each calibrator has an ATEX certified intrinsically safe option (ADT227Ex) allowing you to perform calibration in the harshest of environments. We're confident these new tools will not only meet your calibration requirements but will make metrology simple for you!

Features

Easy-to-use Cellphone Like Interface The ADT227 series brings an all new user interface to the world of process calibrators. With a menu driven interface and a small size/weight, the ADT227 is the industry's smallest advanced multifunctional process calibrator with an intrinsically safe version to boot (ADT227Ex). It adopts advanced human hand 6.0000 engineering design for the most convenient field handheld process calibrator available 100.00 The ADT227 has been developed with a powerful embedded operating system which solves common problems of other designs including slow response, cumbersome key operation, high power consumption and overall slow processing. Accuracy Additel's new and improved ADT227 series provides much improved 0.497993 accuracies including an electrical accuracy of 0.005% RD + 0.005% FS, high-static differential pressure mode accuracy to 0.002% FS and across the board improvements in temperature measurement accuracies. 0.0000

Salt Lake City Office 1364 West State Rd. Suite 101 Pleasant Grove, UT 84062, USA **Features**

Thermocouple Measurement Performance

The ADT227 series delivers highly improved thermocouple measurement capabilities by vastly improving the cold junction compensation(CJC) specifications and a much improved stabilization time.

•c 100.036

Portable and Robust

The demands of remote calibration work can be challenging. The ADT227 series is lightweight and highly portable and utilizes an advanced color LCD screen to help ensure you can easily see, even in the (Ex) intrinsically safe versions.

All models in the ADT227 family have been designed with ruggedness and dependability in mind and meet IP67 standards with a 1-meter drop test, 4G vibration, xenon exposure and 130g steel ball drop testing of the display.

Other environmental conditions have also been considered, such as temperature and humidity. To combat these external elements, Additel has designed a unique internal circuit design and process technology to allow for the utmost confidence in your critical calibration and measurement work.

Intrinsically Safe Option

The Additel 227Ex series calibrators have passed the most stringent testing by certified organizations to acquire intrinsically safe certificates, ATEX, IECEX. The explosion-proof grade (Ex ia IIC T4 Ga), can be widely used in potentially explosive environments, such as oil and gas platforms, oil refineries, chemical and petrochemical plants, pharmaceutical industries, energy and gas processing industries.

Each intrinsically safe calibrator has an advance transflective color LCD display which has enhanced visibility when viewed in direct sunlight. No matter where your work takes you, these calibrators are up to the task.

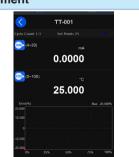

Voltage Meter (RMS)

The Additel 227 non-Ex version is equipped with "true effective value" RMS measuring function, which can measure the RMS of various waveforms with no need to consider distortion or waveform parameters and other errors caused by various waveforms

Automated Tasks for Paperless Calibration Management

Additel 227 Series Calibrators come with a powerful documenting calibration task application which provides a turnkey solution for automation and paperless calibration management.

Tasks are easily created for temperature, pressure, flow and loop instruments. Up to 10,000 documented tasks for ADT227 and up to 1,000 documented tasks for ADT227Ex can be stored in the extensive on-board memory. Many tasks, when executed, are fully automated in data collection and performance validation, such as pass/fail and hysteresis calculations. All information can be integrated into Additel's ACal software for additional calibration management.

Full HART Communicaton (For ADT227-HART only)

The built-in full HART communicator will work with most HART transmitters . The ADT227-HART contains an extensive DD library to meet the needs of your smart transmitter. Our DD library is updated on a regular basis and at no additional cost. The ADT227Ex-HART is integrated with basic HART communication functions, permitting users to monitor, control, and calibrate HART instrumentations. It's an ideal device for calibrating, maintaining, and troubleshooting HART instrumentations.

C

Targeted application features

The onboard applications provide a useful selection of features including HART communicator, high static differential pressure mode, pressure leak test, safety valve test, analog transmitter calibration, unit converter, thermal calculator, and snapshots to name a few.

High static differential pressure mode uses two sensors, unique calculation technology to achieve a differential pressure measurement to 0.002% FS at high static pressures. The leak test will automatically calculate the pressure drop to determine a leak condition. The safety valve test is a specialized task which captures the exact pressure release point by taking 10 readings per second during a valve crack test.

You will find this and much more as we continue to develop new apps at Additel.

Data Logger (For ADT227 & ADT227-HART only)

The ADT227 calibrator can record pressure, temperature and electrical signals. Recorded values can be displayed numerically or graphically to identify trending. The ADT227 & ADT227-HART can store up to 500 results. each result can include up to 100,0000 recordings and each recording can record a maximum of 7 channel values. These results can easily be exported to Additel's application software. Each log session is easily configured at a set interval and provides a date and time stamp with each reading.

Users can remotely connect mobile devices to the ADT227 via Bluetooth with an unobstructed distance up 20 meters. The included USB type-C comm port and cable provide a hard wired communication option as well as charging for the removeable Li-ion battery, which provides up to 12 hours of run time.

Time Saving Features

Connectivity & Battery

In addition to all the great features mentioned above, the ADT227 series is loaded with time saving features like our builtin pressure and temperature converter, thermal calculator, wiring diagram guide for assisting with electrical connections, a built-in diagnostic center including intelligent alarm messaging and a real time error report and comprehensive selftesting to help our customers get the very most out of their investment in Additel calibration tools.

Note 1: When the environment temperature is (-10 \sim +10) $^\circ\!\mathbb{C}$ and (30 \sim 50) $^\circ\!\mathbb{C}$, the temperature coefficient is:

Voltage, current, thermocouple, thermal resistance output: \pm 5 ppm FS/ $^{\circ}\!\mathrm{C}$ (for Non-Ex version);

When the environment temperature is (-20 \sim -10) $^\circ\!{\rm C}$, the temperature coefficient is:

Voltage, current, thermocouple, thermal resistance output: \pm 5 ppm FS/°C (for Ex version);

Note 2: Output features:

Voltage output : $\pm 150 \text{ mV} / \pm 1.5\text{ V} / \pm 15\text{ V}$, Maximum load current: 10 mA, (For Ex-version load current 5mA), load effect: 50 uV / mA; Current output (0 \sim 25) mA: Maximum open circuit voltage: 24 V, driving capacity: 1 k Ω / 20 mA, maximum external voltage: 50 V;

(For Ex-version,Maximum open circuit voltage: 15 V, impedance: 400Ω , driving capacity: 6 V / 20 mA, maximum external voltage: 30 V) Frequency output: square wave, adjustable duty cycle, square wave amplitude (0~15) V adjustable, amplitude accuracy \pm 0.2%FS(for Non-Ex version); Frequency output: square wave, 50% duty cycle, square wave amplitude (0~10.5) V adjustable, amplitude accuracy \pm 0.2%FS(for Ex version); maximum load current: 10mA (For Ex-version,1mA);

Supported units: Hz, kHz, MHz, CPM, CPH, s, ms ;

Zero-crossing sine wave / triangular wave amplitude: (0.1 \sim 30) Vp-p adjustable(only for Non-Ex version),

Amplitude accuracy 3 % Vp-p + 75 mV, supporting display valid value. [1]

Thermocouple output: maximum load current: 5mA, load effect: < 5 uV / mA;

Thermal resistance output: maximum excitation current: $lex^{400}<1.6V(0 \sim 400) \Omega$, $lex^{*}Rsim<1.6V(400 \sim 4000) \Omega$;

minimum excitation current: 0.2 mA@(0 ~ 400) Ω , 0.1 mA@(400 ~ 4000) Ω ;

support 1ms pulse excitation. (For Non-Ex version)

Thermal resistance output: Excitation current: (0.2~2) mA@(0 ~ 400) Ω , (0.1~0.3) mA@(400 ~ 4000) Ω ;

support 1ms pulse excitation. (For Ex version)

| Pulse | Optional rising edge or fa | Optional rising edge or falling edge, minimum threshold voltage: 2.5V | | | | | |
| Switch | Supports dry or wet switc | hes. Voltage r | ange of 3 to 30 V. Response | speed < 10 ms | | | |

Note 1: When the environment temperature is (-10 \sim +10) $^{\circ}$ C and (30 \sim 50) $^{\circ}$ C , the temperature coefficient is:

Voltage, current, thermocouple, thermal resistance output: ± 5 ppm FS/°C (for Non-Ex version);

When the environment temperature is (-20 \sim -10) $^\circ\!{
m C}$, the temperature coefficient is:

Voltage, current, thermocouple, thermal resistance output: ± 5 ppm FS/°C (for Ex version);

AC High Voltage TRMS measurement: ± (250 ppmRDG + 25 ppmFS)/°C ; DC High Voltage measurement:± 25ppmFS/°C

Note 2: Input features:

Voltage range: (-300 ~ 300) mV, input impedance >100 MΩ; (-30 ~ 30) V, input impedance >1MΩ;

Current measurement: input impedance < 40 Ω ;

TC measurement: input impedance >100 MΩ;

AC High Voltage TRMS measurement: input impedance: > 4MΩ, <100pF, AC coupling; Maximum input voltage: 300 V, IEC61010 300V CATII;

 $9\% \sim 100\%$ of the range is applicable to the accuracy index above.

DC High Voltage measurement: > 4 MΩ, DC coupling; Maximum input voltage: 300 V, IEC61010 300V CATII; Common-mode rejection:>100 dB (in 50 or 60 Hz) Note 3: The thermal resistance measurement excitation power supply is 0.2mA. There are four wire system, three wire system and two wire system measurement modes at each gear position. The accuracy indicators are as follows:

The accuracy data given in the table is the accuracy data in 4-line system; 3-wire system accuracy is +10 m Ω on the basis of 4-wire system accuracy; 2-wire accuracy is +50 m Ω on the basis of 4-wire accuracy;

Note 4: Minimum threshold voltage for frequency and pulse measurement: 2.5V; Note 5: Frequency measurement unit: Hz, kHz, MHz, CPM, CPH, s, ms, µs;

Note 6: Optional rising edge or descending edge trigger mode for pulse measurement.

Pressure Specification

Pressure Specification (ADT227 & ADT227Ex)

The ADT161 and ADT161Ex series Intelligent Digital Pressure Modules are available for gauge, vacuum and absolute pressure from -15 psi to 60,000 psi (-1 bar to 4200 bar). Accuracy from 0.02% FS includes operation over 14°F to 122°F (-10°C to 50°C), one year stability and calibration uncertainty. For detailed specifications, please refer to the pressure modules datasheet.

Note: Internal CJC is ±0.15°C (-10°C to 50°C ambient temperature)

Accuracy with external cold junction only, for internal cold junction add 0.15°C (k=2)
